Profile

Frontend Developer with 2+ years of hands-on experience building over 20 responsive landing pages, internal tools, and full-featured web applications using modern technologies such as React, Next.js, TypeScript, Redux Toolkit, and Zustand. Skilled in developing Chrome extensions for automation and data scraping, with a strong focus on performance, scalability, and user experience. I thrive in collaborative environments, constantly seek to improve my technical capabilities, and enjoy turning complex ideas into clean, maintainable UI solutions.

Professional Experience

2024/05 – present
Bandung, Indonesia

PT Knitto Tekstil Indonesia

Frontend Web Developer

- Implemented UI virtualization for large data sets using windowing techniques (e.g., react-window), significantly improving rendering performance and reducing memory usage.
- Built infinite scroll functionality for dynamic content feeds, enhancing user experience by seamlessly loading paginated data as users scroll.
- Applied the Singleton pattern to manage global services (e.g., authentication, configuration, or API clients) to ensure state consistency and avoid redundant instances across the application.
- Integrated AnyTrack tracking to monitor user behavior, conversions, and events across the application, enabling accurate attribution and performance analysis.
- Configured custom event tracking for key user actions (e.g., sign-ups, purchases, CTA clicks) to align with business goals and improve marketing campaign insights.
- Developed websites and internal applications using React.js, Ant Design, Tailwind CSS, Redux, RTK Query, and Next.js.
- Implemented a monorepo strategy to manage multiple applications and libraries within a single integrated repository, enabling more efficient collaboration among teams and easier code management.
- Designed and implemented a Chrome Extension especially for the Qiscus platform to streamline various operational tasks and making it easier for teams to manage customer interactions and operations.
- Designed and developed a custom UI component library to ensure consistent styling, reusability, and scalability across multiple projects.
- Utilized Storybook to present custom UI library components in an interactive and user-friendly, allowing developers to easily view, test, and modify components in real-time.

2023/09 – 2023/09
Bandung, Indonesia

PT. MEA Digital Marketing

Frontend Web Developer

- Developed websites using React.js, Redux, and Bootstrap 4.
- Implemented unit testing with Jest for component and JavaScript code testing.
- Set up CI/CD pipelines for automated deployments.
- Collaborated with UI/UX teams for UI slicing and with backend teams for API integration.
- Integrated error tracking using Honeybadger.

- Designed, maintained, monitored, improved, and fixed bugs using Next.js, Tailwind, Jest, Zustand, and Honeybadger.
- Developed Chrome extension tools using Webpack, SCSS, HTML, and React.js.

2020/09 – 2021/07
Bandung, Indonesia

CV Dian Global Tech

Fullstack Developer

- Created application documentation for clients.
- Developed an incoming and outgoing mail web application using Codeigniter and jQuery.
- Built a student assessment web application using Codeigniter and jQuery.

Education

2016 – 2020
Bandung, Indonesia

STMIK Bandung
Bachelor's Degree
